

# Phase-In / Phase-Out Plan

## Phase-Out WR810 and Phase-In E10

The WR810 model number will be phased out starting January 2024 and replaced with E10 as the model number. This will be applicable to all existing and future WR810 machine models.

The significance of the E10 model number is:

E = Elphinstone

10 = nominal capacity in metric tonnes (depending on configuration)

All marketing literature, website and future machine literature (Operating & Maintenance Manual, Parts Manual, etc) will be changed to the E10 model number.

Technically there is no change to any of the machines. Visually the machine will have updated decals to reflect the model number change.

*Note: Image referential only and machine may have optional equipment fitted.*

Model	Description	Serial Number	Market	Last Production
WR810	Agitator 6m <sup>3</sup>	Up to 18YP0127 and 18JD0102.	Global	Q4-2023
