

E10

AGITATOR 6M³

**E10 UNDERGROUND
AGITATOR 6M3**

RELIABILITY AND PERFORMANCE IN TOUGH CONDITIONS.

Machine Safety

With safety as a priority, the E10 is engineered with onboard machine diagnostics for rapid fault identification, increasing the availability and productivity of the machine. The certified ROPS/FOPS air-conditioned operator cabin seats three persons comfortably. The ergonomic controls, excellent visibility, and LED lighting increase safety and reduce operator fatigue. The oscillating hitch, front suspension (optional) and air-ride seats provide unrivalled comfort for the operator. The electromagnetic braking retarder, adjustable from the operator's seat, provides superior and reliable braking capability.

Maintenance and Serviceability

A forward-tilting cabin, swing-out radiator grill, hinged engine bonnet cover, and hinged exhaust module, provide safe access for maintenance. Ground level access to service points reduce risk and time spent checking the machine status.

Machine Application

The E10 chassis is a multipurpose platform designed for various underground mining applications. Machine productivity is directly related to speed, capacity and reliability, all features considered by Elphinstone in the design of the Agitator. The Caterpillar powertrain provides haulage speeds on grade equivalent to production equipment resulting in maximum productivity across the mining fleet. The bowl has a maximum capacity of 6m³ and allows mixing of wet or dry product with variable speed control.

DELIVERING POWER AND CONTROL AT FULL CAPACITY.

Machine application

- » Bulk transport of concrete to back fill voids.
- » Transport of shotcrete to a shotcrete machine in a new development.
- » Excellent top speed at full capacity improves the cycle time and allows the machine to travel at the same speed as the production fleet resulting in increased production.

Wet or dry product loading

The 6m³ (7.8yd³) capacity agitator bowl can handle wet or dry product due to the machines ability to program mix and transit speeds which results in greater mixing versatility.

Dual loading access available

Loading of the agitator bowl can be achieved vertically via the chute or horizontally via conveyor (optional).

Water tank

Optional stainless steel water tank with flowmeter. On-board water storage to enable alterations to the batch or for wash down purposes.

Chemical agent tanks

Optional stainless steel chemical dosing tanks equipped with flowmeter. On-board chemical tanks to enable addition of agent in-situ at the work site.

Mixer

- » Electro/Hydraulically controlled for mixing and unloading.
- » Manual bowl controls at ground level.
- » Quick disconnect hydraulic fittings on bowl motor.
- » Slump meter.
- » Bolt on external bowl access covers.
- » Emergency stop switch at ground level.

Optional features include:

- » High mounted chute camera.
- » Chute extensions.
- » Ground level bowl guards.
- » High volume, low pressure water pump and hose reel.
- » Low volume high pressure water pump and hose reel for machine washdown.

STRENGTH AND SUPERIOR BRAKING PERFORMANCE.

Heavy duty front frame

The robust, heavy-duty, and purpose design front frame utilises a high tensile steel construction with an average plate thickness of 20mm (0.80in). The frame design is common to both front and centre-mounted operator cabin options, both engine options and the option of front suspension or rigid axle.

The front suspension mounting points and fuel tank are incorporated into the common frame. The frame includes an access cover for cleaning and inspecting the fuel tank if required.

Rear frame

The rear frame uses high tensile steel box section construction with an average thickness of 12mm (0.47in). The agitator bowl can be positioned lower due to the increased width of the frame, reducing the overall height and centre of gravity.

Oscillating hitch

The oscillating hitch provides superior operator comfort, 4-wheel ground contact and reduced wear on the hitch and steering components. Includes a heavy duty 600mm (1ft 11in) deep frame section through oscillating hitch area with +/- 42.5° steering articulation and +/- 10° oscillation.

Electro-magnetic retarder

Fitted to the rear frame, the electronically controlled retarder provides superior braking performance on grade, featuring diagnostic capabilities with alarm and fault conditions reported back to the operator display. The integrated Retarder Control System (iRCS) combines both the control and power functions into a single unit. The innovative electronic design significantly reduces the retarder's energy consumption, preserving electric circuits. The retarder is controlled via an integrated multi-function joystick controller located on the operator's right-side armrest.

Agitator bowl transmission

The E10 agitator bowl features a transmission commonly used world wide in other cement mixing applications and has proven to be reliable and easily serviced.

Major advantages of the transmission include:

- » Low noise: up to 10dB less noise than other transmissions.
- » Increased efficiency: up to 0.5L (0.13gal) fuel saving per operating hour.
- » Tougher more robust design leading to increased bearing life.
- » Sealed for life servicing: reduced maintenance.
- » Vibration isolation via elastomer pad results in improved driving comfort.
- » Quick connect fittings on bowl motor for easy change over to auxiliary hydraulic power supply.
- » Variable speed output ranging from 0-19 rpm.

COMFORTABLE AND EASY TO OPERATE.

Two cabin configurations available

Fitted with a standard 3-seat open cabin, the E10 is also available with an optional air-conditioned, 3-seat enclosed cabin (pictured above). The enclosed cabin features ergonomics for operator comfort, user-friendly intuitive controls, and excellent 360-degree visibility.

The cabin includes the following features:

- » ROPS/FOPS certified design.
- » 300mm (12in) touch screen operator display.
- » Fingertip controls mounted to operators seat.
- » 3 full size seats. Air-ride suspension seat standard for driver, non-suspended seats for occupants. Optional Air-ride suspension seats for all persons.
- » Air conditioning and optional cab pressurisation.
- » Seat belts with occupant detection systems (operator seat).
- » Forward tilting cab for ease of maintenance.
- » Emergency stop inside cab.

Integrated multi-function joystick controller

The operator's right arm rest features an integrated multi-function joystick controller providing finite control in transit for agitator speed and machine braking performance.

Transmission controls

The keypad transmission control is conveniently located near the operator's right hand, with forward and reverse gears changed effortlessly with finger touch accuracy reducing driver fatigue.

Seating arrangements

The standard seating arrangement includes a centre driving position with two additional trainer/work-crew seats. The driver's seat is a 'T' seat with air suspension, and the crew seats are a standard 'T' seat or optional 'T' seat with air suspension. A storage compartment is optional if trainer/work-crew seating is not required. Retractable seat belts are standard with an occupancy indicator alarm system available as an option. The alarm is activated if the seat belt is not fastened as the machine brakes are released.

Steering column

The steering column can be adjusted to an ergonomic position for maximum operator comfort by tilting or extending the column.

Tilted cab mounting

The cabin is resiliently mounted to the machine chassis, reducing vibration for greater operator comfort and a quieter ride. The cabin tilts and locks into position with supports for safe and easy maintenance.

Touch screen operator display

The 300mm (12in) touch screen displays vital machine status information. Data collected includes engine coolant and transmission oil temperature, pitch and roll indicators, engine oil pressure, engine speed, an integrated camera system (up to 4x), and vehicle speed and fuel level.

Machine health monitoring system

The monitoring system and alarm strategy provides a 3-tier warning and shutdown functionality alerting the operator of any abnormalities and automatically limits the machine's functions.

SAFETY FEATURES

OPERATOR SAFETY IS OUR PRIORITY.

Machine isolation

All engine and machine isolation functions are conveniently located on one panel accessible from ground level. Switches have been designed to incorporate the requirement for the site tag in/out machine isolation process.

- » Battery isolation switch.
- » Starter isolation switch.
- » Jump start receptacle.
- » Fire system activation (optional).

Cabin protective structure

The operator cabin has an integrated Rollover Protective Structure (ROPS) certified to ISO 3471:2008 and Falling Object Protective Structure (FOPS) certified to ISO 3449:2005.

Handrails

Handrails are fitted standard in accordance with ISO 2867:2011. All handrails are painted green and designed for 3-point access to cab and machine.

Steering

Full hydraulic controlled steering via opposed cylinders at the oscillating hitch. Secondary emergency steering is also provided as standard.

Braking

Service brakes are hydraulic applied wet disc brakes. Emergency brakes are spring applied hydraulic release at the wheel ends. Braking systems meet ISO 3450:2011.

Additional safety features

- » Anti-skid step surfaces.
- » Inertia reel retractable seat belt.
- » Steering frame lock.
- » Electrical wiring segregation from all hydraulic hosing.
- » Fire resistant wiring.
- » Firewall / heatshields.
- » Machine interlocks (Battery and Starter) for additional protection.
- » Integrated fire suppression systems (optional).
- » Hydraulic hosing covered with burst protection sleeves.
- » Door ajar warning (Operator Presence) systems.
- » Door lighting for better step visibility.
- » Window egress cord for ease of cab window removal.
- » Rear view camera.
- » Park brake interlocking.
- » Bowl lifting points and bowl rotation.

Ground level servicing access

Allows convenient servicing to tanks, filters, lubrication points and compartment drains.

Speed control

Speed control allows the operator to set the maximum speed on grade and the machine uses the electromagnetic retarder and the powertrain inertia to maintain the speed.

When on flat ground the operator can accelerate over the maximum set speed however when the accelerator pedal is released the machine will reduce speed back to the maximum speed setting.

DELIVERS POWER, PERFORMANCE AND DURABILITY.

C7.1 engine

The Cat C7.1 uses Caterpillar's breakthrough ACERT™ Technology to meet exhaust emission reduction standards. It features efficient fuel delivery, air management and electronic control for high productivity and exceptional service life.

The C7.1 ACERT Tier 3 engine arrangement rated at 168 kW (225 hp) is standard for regions that may not have Ultra Low Sulphur Fuel or more stringent emission regulations. An optional diesel particulate filter can be fitted.

The C7.1 ACERT Tier 4 Final engine arrangement is available as an option, adhering to EU Stage V exhaust emission standards. This arrangement is offered in a dual horsepower configuration and can be set at 151kW (202hp) for the higher performance rating or the lower reduced ventilation rating at 129kW (173hp) through a simple software change performed by your Caterpillar Dealer.

ADEM A4 engine control module

The ADEM A4 module controls the fuel injector solenoids to monitor fuel injection. It also provides automatic altitude compensation, and will not allow the engine to start until it has oil pressure, acting as cold start protection and a form of pre-lube.

Maintenance

The C7.1 engine reduces costs and downtime with 500-hour oil change intervals. The E10 is equipped with Caterpillar high efficiency oil filters, a design which doubles efficiency without increasing the change interval.

Engine protection system

An engine protection system is fitted that will shut down the engine if low engine oil pressure, low coolant level, or coolant over temperature conditions are experienced.

Commonality

The Caterpillar C7.1 engine is found in several Caterpillar products and applications such as Medium Wheel Loaders, Excavators, Motor Graders, Marine and Industrial services. This means the E10 shares component commonality across many applications, providing the highest level of reliability and durability, as well as superior parts availability worldwide through the Caterpillar Dealer Network.

PERFORMANCE AND RELIABILITY IN TOUGH CONDITIONS.

Caterpillar five-speed transmission

The field proven Cat power shift countershaft transmission easily matches engine power to the load size and ground conditions. Gear changes are simplified with ergonomically positioned electronic fingertip controls, reducing operator fatigue.

Electro-magnetic retarder

Fitted to the rear frame, the electronically controlled retarder provides superior braking performance on grade, featuring diagnostic capabilities with alarm and fault conditions reported back to the operator display. The integrated Retarder Control System (iRCS) combines both the control and power functions into a single unit. The innovative electronic design significantly reduces the retarder's energy consumption, preserving electric circuits. The retarder is controlled via an integrated multi-function joystick controller located on the operator's right-side armrest.

Reduced shifting

The multiplication capability of the torque converter reduces the need for the operator to continually shift the transmission. This reduces operator effort and improves machine productivity.

All wheel drive (AWD)

All-wheel drive provides excellent power distribution, increases traction of the machine reducing tire slippage, improving performance, handling and manoeuvrability in tough and challenging terrain.

Front and rear axles

The front axle is rigid mounted design with front suspension available as an option. The rear axle is rigidly mounted to the rear frame.

Tyres

Tyres are an integral part in a machines ability to carry it's load at higher speeds. Fitted with the larger 14:00 R20 Radial tires ensures the E10 stays within the tires TKPH limits. This allows the E10 to carry larger loads at faster speeds than conventional utility equipment.

Service brakes

Hydraulically applied spring release brake system. Brake components are oil immersed inside the axles, protecting them from contamination. Modulated braking provides smooth deceleration for precision stopping and operator control.

Parking brake

The parking brake is a spring applied oil released "fail to safe" enclosed wet disc on all 4-wheel ends.

Brake design

With large discs and plates for reliable, adjustment free operation and performance. Oil cooled disc brakes are completely enclosed to prevent contamination and reduce maintenance.

Emergency braking

When the E10 safety system detects loss of critical drive pressure or brake pressure the operator will receive a warning and then the parking brake system will be safely apply.

Load sensing

A load sensing variable displacement pump and pressure compensating system continually monitor hydraulic power requirements, then provides power based on demand. This improves fuel economy and reduces emissions.

Other features include suction circuits, pump case-drain and steering return, filtered fan/brake pressure circuit, and closed loop hydraulic system.

FEATURE OVERVIEW

DELIVERING SHOTCRETE OR CONCRETE ON TIME WITH IMPROVED RIDE CAPABILITY.

● Standard ● Optional ● Safety

HINGED ENGINE BONNET

Allows easy access to engine and exhaust system

LED LIGHTING

All operation lighting

3-SEAT OPEN CABIN ROPS/FOPS CERTIFIED

Cabin tilt for maintenance and serviceability

REAR WINDOW GUARD

3-SEAT ENCLOSED CABIN CLIMATE CONTROLLED ROPS/FOPS CERTIFIED

Superior operator comfort and cabin tilt for maintenance and serviceability

SWING OUT RADIATOR GRILL

Provides easy access to facilitate cleaning and maintenance on cooling system

HYDRAULIC OIL TANK

Located on RHS of engine

RETARDER DIAL CONTROLLER

Located on the operator's arm rest

BOLT-ON RADIATOR COVER

ENCLOSED BATTERY COMPARTMENT

MACHINE LIFTING POINTS

Painted red

FIRE SUPPRESSION ACTUATION

E10
AGITATOR

EMERGENCY STOP

MACHINE TIE DOWN POINTS

MACHINE ISOLATION

Located at ground level adjacent to operators cabin

ARTICULATION LOCK

OSCILLATING HITCH

Provides superior operator comfort while maintaining constant ground contact

WHEEL CHOCKS x2

Stored below grill

GROUND LEVEL ACCESS TO ALL FILTERS AND SERVICE POINTS

All filters and service points can be serviced from ground level on the access platforms on either side at the front of the machine

ELECTRO-MAGNETIC BRAKING RETARDER

Adjustable from the operator's seat, provides superior and reliable braking capability

CENTRE MACHINE RETRIEVAL POINT

Painted red

BOWL CONTROL PANEL

Located on RHS side of machine at ground level, emergency stop (standard) and fire suppression actuation (optional)

SWIVEL CHUTE

Hydraulically raised and lowered

BOWL ROTATION LOCK

Painted red (obscured by motor)

ADDITIVE TRANSPORT RACK 3x20L DRUMS

Located on RHS side of machine at ground level

TRUNNION ROLLER GUARDS

WORK LIGHTS

CHUTE GUARD AND RETAINING STRAP

FEED CHUTE

LARGE 6M³ AGITATOR BOWL

Includes two inspection hatches 180 degrees apart and lifting points on front and rear of bowl

CHEMICAL TANK
WATER TANK

Stainless steel fill points located on RHS side of machine at ground level

BOWL MOTOR WITH VIBRATION ISOLATION MOUNTS

BOWL GUARDS

Located on both sides of bowl

AUTO LUBRICATION PUMP

Automatically supplies grease to all lubricating points on machine mounted at ground level for access

HIGH PRESSURE WASH DOWN HOSE REEL AND WAND

TIE DOWN LIFT POINT

Painted red

CENTRE REAR MACHINE RETRIEVAL POINT

Painted red

REAR ACCESS STEPS AND PLATFORM

3 points of contact with hand rails and self-closing gate

FIRE SUPPRESSION SYSTEM

Mounted at ground level for access and includes nozzles mounted throughout the engine compartment

3-PIECE WHEEL RIMS

CUSTOMER SUPPORT

WHEN UPTIME REALLY COUNTS.

Renowned Cat dealer support

From helping you choose the right machine to financing and ongoing support, your Cat dealer provides the best in sales and service.

- » Manage your costs with preventive maintenance programs like SOS™ fluids analysis, coolant sampling.
- » Stay productive with best-in-class parts availability.
- » our Cat dealer can also help you boost efficiency with operator training.
- » When it's time for component replacement, your Cat dealer can help you save even more. Genuine Cat remanufactured parts carry the same warranty and reliability as new products at savings of 40 to 70 percent for powertrain and hydraulic components.
- » Technical training and maintenance planning are also part of the Dealer offerings.
- » Would you like the Dealer to do more? Programs such as Customer Service Agreements, to a full Maintenance and Repair contract are available.

FUTURE SUSTAINABILITY

THINKING INTO THE FUTURE.

Sustainable waste and cost management

- » Integrated machine systems and technologies improve productivity for greater accuracy, lower fuel use and reduce machine wear.
- » Replaceable wear parts save maintenance time and cost and extend major component life.
- » Ecology drains help make draining fluids more convenient and help prevent spills.
- » Major components are built to be rebuilt, eliminating waste and saving customers money by giving the machine and/or major components a second – and even third life rebuilds.
- » A variety of safety features help safeguard operators and others on the job.

SERVICEABILITY MEANS MORE TIME FOR PRODUCTION.

Engine access

Forward tilting cabin, swing out radiator grill, hinged bonnet and exhaust module make regular maintenance quick and easy. Easy access to daily service points increases the likelihood that maintenance will be done resulting in increased machine service life. In addition, less maintenance time means more working time and greater productivity.

Frame access

Steps and grab handles positioned for 3-point contact are standard for easy access to the service and operation areas.

Bolt-on guards

Bolt-on guards offer protection to critical components and are easily removable for servicing. Removable floor plates and side plate allow access to components under the cab.

Air filters

Air filters are easy to change, reducing air filter maintenance times.

Extended oil service intervals

A 500-hour oil change interval reduces downtime for service and lowers maintenance costs.

SOS™ fluid sampling valves

Provides a fast, convenient way to gather uncontaminated fluid samples, which improves analysis reliability.

Pressure taps

Conveniently located for easy access to hydraulic system pressure measurements.

Electrical system

The 24V electrical system delivers a reliable electrical capacity for engine starting and additional lighting. Wiring circuits are colour coded and numbered for easy diagnosis and repair. All circuits are protected by circuit breakers. Wiring is double insulated with sealed electrical connectors to prevent moisture and dirt access. Harnesses are covered with fire resistant material for additional protection.

On-board diagnostic systems

The monitoring system continuously checks all critical machine functions and components and helps locate faults quickly for faster repair.

Hitch hoses

- » The pilot hoses, pressure line and load sense lines have all been routed above the hitch and bulk-headed for easy hose replacement and fast service.
- » Spin-on oil filters.
- » Spin-on fuel and engine oil filters shorten downtime.
- » Electronic transfer pump eliminates the need to manually prime the fuel system.

Centralised service centre

A centralised service centre that includes fast fill and evacuation points (optional).

OVER 45 YEARS IN THE MINING INDUSTRY.

Elphinstone Pty Ltd is an established Caterpillar Original Equipment Manufacturer with over 45 years' experience in the mining industry. Elphinstone specialises in the design, manufacture and support of quality equipment for the global underground and surface mining industries.

The Elphinstone range of Underground Mining Support Vehicles combines practical design, the latest technology and quality manufacturing to ensure reliable performance.

The current product range includes specialised underground support vehicles, mine extraction devices, extended distance off-highway haulage trucks and water tanks customised to suit Caterpillar articulated trucks.

As an authorised Caterpillar Original Equipment Manufacturer, all Elphinstone products are sold and supported via the global Cat® dealer network.

E10 AGITATOR 6M³
