

DEFENCE MANUFACTURING STATEMENT

Elphinstone Pty Ltd | September 2026

ELPHINSTONE

SOVEREIGN DEFENCE MANUFACTURING PARTNER.

Australian-Owned

Elphinstone Pty Ltd is a wholly Australian-owned defence manufacturing partner specialising in large-volume vehicle, machine and subassembly manufacture for local and global markets. From our advanced manufacturing facility in North-West Tasmania, we support Defence Primes and Tier 2 contractors with high-quality fabrication, precision machining at scale, surface coating and complex assembly capability.

50+ Years of Experience In Manufacturing

Established in Burnie in 1975, Elphinstone has built a reputation for quality, reliability and dependable delivery across demanding industrial and defence programs. Our team combines experienced tradespeople, disciplined production systems, in-house tooling development capability and a mature supply chain to deliver repeatable outcomes where precision, traceability and conformance matter.

For purchasers seeking assured Australian Industry Capability, Elphinstone offers a scalable sovereign manufacturing base supported by 120 employees and a 12000 square metre facility, direct freight access to mainland Australia via Melbourne and Geelong, and practical experience working with international companies on complex manufacturing requirements.

Why Elphinstone for Defence Manufacturing?

01. Wholly Australian-owned and operated, supporting AIC and ACE objectives.
02. 50+ years' experience supplying and supporting equipment across global markets.
03. Dedicated defence manufacturing team and facility.
04. Large-scale fabrication, precision machining, coating, testing and assembly under one manufacturing partner.
05. ISO9001 certified and DISP accredited.
06. Qualified and certified tradespeople supported by embedded LEAN methodologies.
07. 100% net renewable energy use through our Tasmanian operating location.
08. Employs 120 highly skilled tradespeople.
09. 12000 m³ Manufacturing facility in Tasmania.
10. Facility powered by 100% renewable energy.

LARGE DEFENCE STRUCTURE MANUFACTURING CAPABILITIES.

Expertise and Precision

Elphinstone provides integrated manufacturing capability for defence vehicle structures, machine assemblies and complex subassemblies. Our facilities and processes are suited to programs requiring controlled manufacture, repeatable quality, heavy fabrication expertise and precision machining at scale.

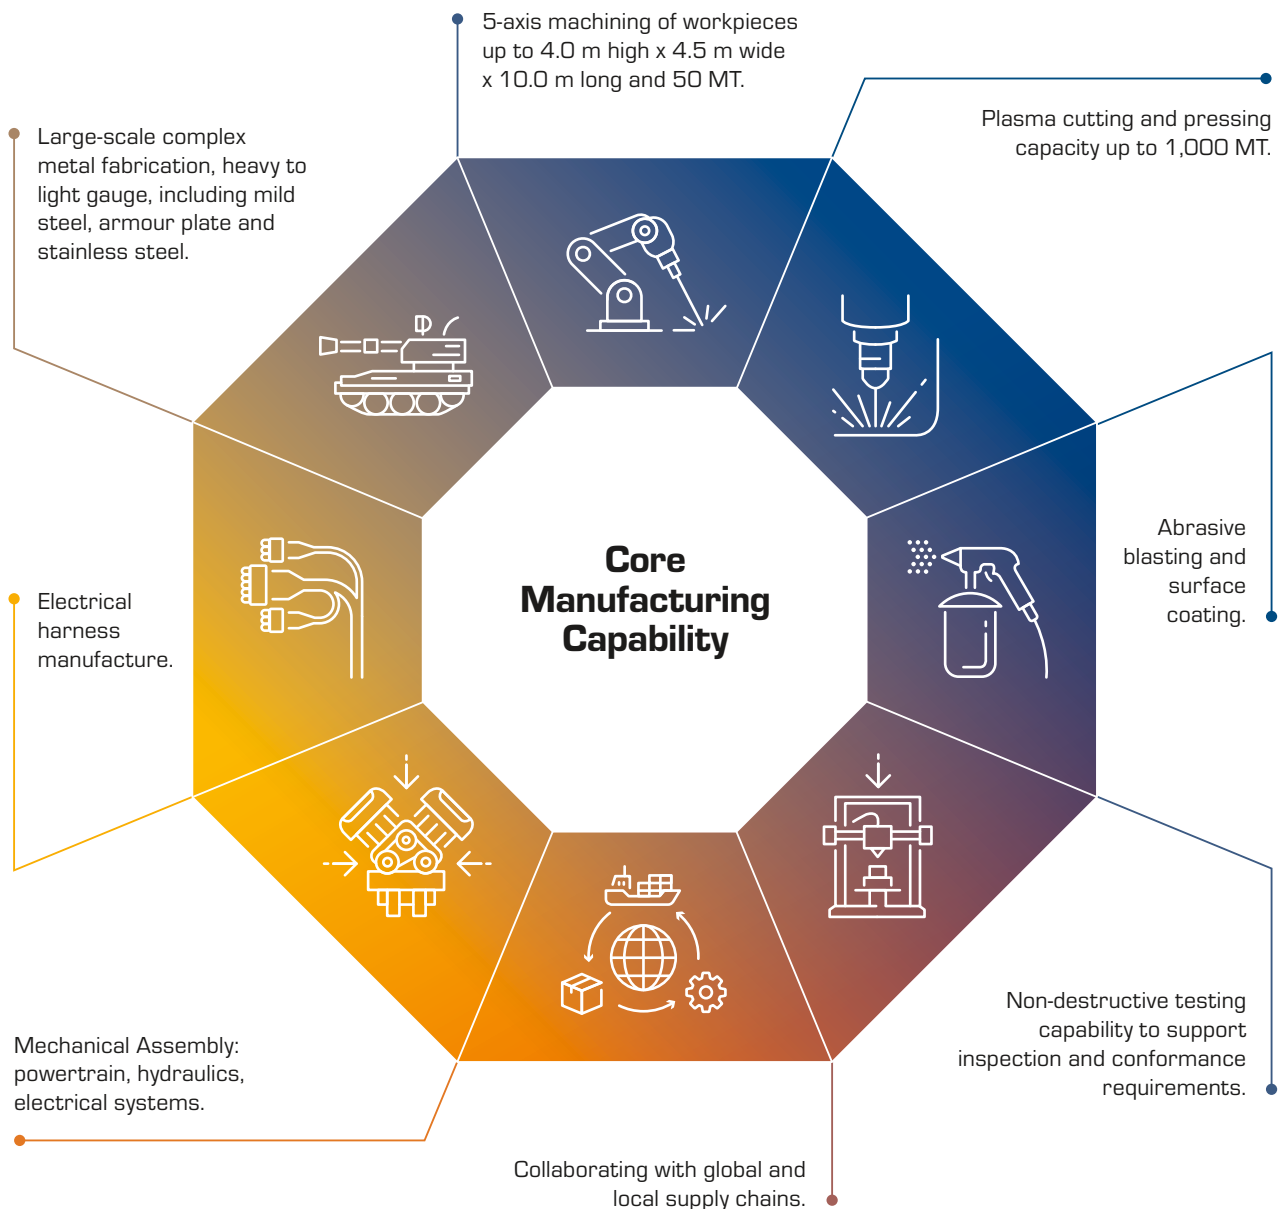

Repeatability through In-House Tooling and Process Control

Jigs, fixtures and manufacturing tooling are designed in-house and used extensively to support efficient, accurate and repeatable manufacturing processes. In conjunction with rigorous training, capability

assessment and process documentation, Elphinstone is able to minimise variation, improve throughput and maintain dimensional consistency across production runs.

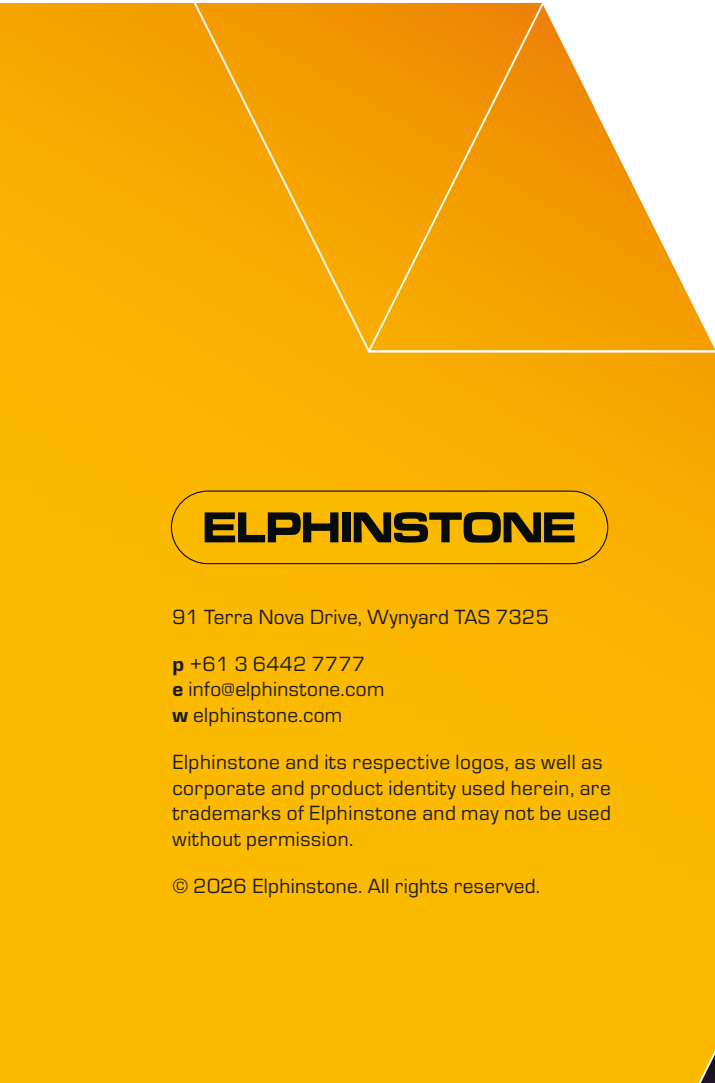

Adding Scale to Precision Machining

Elphinstone's investment in large-format 5-axis machining enables precision outcomes on major structures and large workpieces. This capability allows Elphinstone's customers to source fabrication and final machining through a single Australian manufacturing partner, improving schedule control, quality accountability and interface management.

Elphinstone is a member of the Australian Industry and Defence Network, a highly reputed advocate and collaborator across the defence industry.
